

Home Grown Gardens Food Forest - Centennial Park

- Community Food Forest and Education Space
- Funded by donations, grants and non-profit partnerships
- Ongoing education and programming multiple times per week for all community members (adults, seniors, youth, children, women/girls, men/boys, etc.)
- Free to the community to participate/use
- Examples of similar past projects: We've worked with the Santa Monica and Malibu Unified School District to build a school farm at Will Rogers (Santa Monica) and gardens throughout the Malibu school system. We also collaborate with The Learning Garden at Venice High and LA compost for community composting
