## 1. Land - Suitable Site Analysis

### Methods:

Public data sources, ESRI spatial analysis tools, and a decentralized approach was employed to locate suitable, government owned sites to place emergency off street shelters.<sup>8</sup> Further, suitable sites were identified to conform to the following criteria:

- Gather and geographically locate all available datasets identifying publicly owned land in Los Angeles County
- Variables and areas removed:
  - 600 foot buffer from schools;
  - Significant Ecological Areas;
  - Airport Noise Contours;
  - Parcels that begin more than 40 feet from centerline of streets;
  - Surface water;
  - Land with slope greater than 15%;
  - Building footprints

### Data Sources include:

- \* City Parks
- \* Open Space, whether publicly owned or otherwise.
- \* Government Parcels
- \* Public Facilities
- \* Publicly Owned Land from County Assessor's Office
