To Ban Use of Spray Paint in the Venice Beach Recreation Area

Whereas, spray paint is known to the State of California as a toxic material; and

Whereas, vendors on Venice Boardwalk have for years engaged in activities utilizing spray paint; and

Whereas, these activities are carried out in close proximity to residences and in the midst of large crowds of people milling about on the Boardwalk; and

Whereas, residents, visitors and other vendors are thus subjected daily to toxic chemical propellant fumes and toxic paint mist released from cans of spray paint; and

Whereas, these chemicals can remain airborne for up to two hours and whereas this spray painting is often repeated many times throughout the day, and thus spray paint chemicals can and do remain in the air all day long; and

Whereas, this spray painting is frequently associated with sawing and sanding of materials used in conjunction of the spray painting, causing health hazards from particulate matter being spread into the air; and

Whereas, the use of spray paint along the Boardwalk is a clear danger to the health of residents, visitors and other vendors; and

Whereas, the use of spray paint by artists and others should be confined to proper paint booths with environmental controls;

Now, THEREFORE BE IT RESOLVED, the Venice Neighborhood Council hereby calls upon the City of Los Angeles , the Public Health Department of the County of Los Angeles and the South Coast Regional Air Quality

Board to act to immediately prohibit the use of these toxic materials in the Venice Beach Recreation Area.
