Neighborhood Purposes Grant

Please describe the purpose and intent of the grant.

Verdant Venice Group has permits to plant trees on Penmar, Appleton, and Sunset.

Outreach has been made and will continue to be provided through the Verdant Venice Group's weekly work sessions which are on all Saturday mornings throughout Venice.

Implementation of Shade: All of the trees planted will, in time, provide ample shade to their surrounds. The goal of this entire project is to add to the local canopy and biodiversity.

Who and What is the Verdant Venice Group?

Verdant Venice Group (VVG) is a group of local of volunteers that works weekly on projects to add drought-tolerant canopy and native plants in public spaces, schools and parks throughout Venice. We incorporate education and encourage stewardship of neighbors, including smart watering and planting practices, alternatives to lawns, and stress the value of native trees and under-story plants to create and sustain biodiversity. Founded eight years ago, VVG has grown to over 75 individuals. We have planted and continue to care for over 690 trees along dozens of streets, public parking lots, a library, two parks, and two schools. In addition to their own neighborhood, we have inspired and been mentors to other community groups seeking support.

Our planting events involve volunteers of all ages in the beautification and appreciation of our neighborhood. By inspiring people with the beauty, necessity, and understanding of our natural world and the importance of our local natural resources, we will promote the idea that protecting our watershed is both an individual and collective responsibility. Our volunteer group and other friends and neighbors donate their time toward the labor of planting and caring for these trees for up a minimum of 5 years.

In addition to their beauty, trees have been shown to provide a wide variety of important benefits such as shade in a warming climate and air purification which is especially necessary under the flight path of the SM airport. Young people in underserved communities are especially susceptible to lung damage from air pollution. Tree canopy has also been shown to lead to a decrease in crime and improved learning in school children. Trees provide habitat for butterflies and local and migrating birds. Additionally, the knowledge gained from our projects will help inform the City and our community about our unique native trees and will create a market for these trees so that procurement and initial care is not so time intensive. Beneficiaries are neighbors and businesses interested, low-income apartment dwellers, local school children, and public agencies who lack funds for plant replacement or maintenance.

The project is a good investment since it builds on an already existing structure to improve highly trafficked streets that are deteriorating, and creates on-going education to ensure continual tree care. The project builds community by involving volunteers of all ages in the beautification and appreciation of the community. By inspiring people with the beauty and understanding of our natural world and the importance of our local natural resources, we will promote the idea that protecting our watershed is both an individual and collective responsibility.

Please see the included Impact Report for more information about our work accomplishments so far. Our work is only possible due to the support and hard work of the Venice community and our partners, Recreation and Park, LA DOT, Urban Forestry, and Venice Neighborhood Council.
